Enclosure

OFFICE OF THE SANITARY COMMISSIONER
with the Government, Mysore,

Camp, Mysore, dated 13th Octor. 1924.

Dear Sir,

Muz. 88-24-1. No. 436.

I enclose for the information of Government the accompanying copy of report from the Health Officer, Mysore City, regarding the occurrence of what was believed to be a suspicious case of plague in the premises of the Nanjaraja Bahadur Chattram.

2. Immediately on receipt of information, I inspected the place in company with the Health Officer and after a detailed investigation I am of opinion that the cause of death was not plague but probably Typhoid Fever. Under my personal instructions the affected block has been thoroughly disinfected as a precautionary measure.

3. I agree with the Health Officer as to the urgent necessity for the removal of the cart-stand from the vicinity of the Chattram and for the provision of separate quarters for the "Parapathegar".

I need hardly say that the salubrity of a very desirable residence, - intended to accommodate members of the Representative Assembly and other casual sojourners at the Capital

Capital, - should not be marred by the existence in such
close association of a common country cart-stand.

Yours sincerely,

M. S. Srinivasan

Letter No. S.C.46 dated the 11th October 1924 from the health officer, Mysore City, to the Sanitary Commissioner in Mysore, Bangalore.

I have the honor to inform that one of the conservancy Overseers of the Health Department, Mysore City Municipality by name Krishna Rao aged about 45, took ill about the 24th of the last month. He was the son-in-law of the Parpathyegar of the Nanjaraja Bahadur Chattram. The Parpathyegar usually lives in the first block of the Chattram and vacated the Chattram and lived in a rented house at about a furlong's distance in order to provide accommodation for the guests of the Dasara Festivities and Assembly Members. Overseer Krishna Rao suffered for about 16 days and finally died. I am given to understand that he was being treated by a Hareem and took hospital medicine also for a couple of days.

Two days prior to his death, he was shifted to the third block (servants's block) of the Chattram far removed from the 2 main blocks where the members are accommodated. He had absolutely no symptoms of plague nor was there any rat mortality anywhere closely. The City is free from infection. He has succumbed to Typhoid Fever evidently.

As a precautionary measure I got the third block of the Chattram entirely vacated and thoroughly disinfected. I think there is no cause for any kind of alarm. Arrangements are also made to disinfect and lime-wash the rooms once occupied by the Parpathyegar of the Chattram in the 1st block.

In this connection, I beg to bring to your notice that (1) the cartstand in the premises of the Chattram is a great nuisance and should be immediately shifted from the place. The creation of a garden in its place is desirable. (2) The Parpathyegar of the Chattram should not be permitted to occupy rooms inside. He may be given quarters elsewhere.

Finally, I may mention that all possible sanitary arrangements are made to keep the place in a clean and tidy condition. The latrines are being flushed with disinfectants and the staff are in constant attendance to attend to the safety of the guests.

13th October 1924 from the Sanitary Commissioner in Mysore re removal of cart stand in the vicinity of the Nanjaraja Bahadur Chattram to some other place and providing the Parbatapur with sewerage quarters.

Resolution

(1) There has been no complaint on the part of occupants about the cart stand. The cart stand and the attendant facilities yield a revenue of over Rs 800/ per annum for the institution which cannot be foregone - attempts will be made to keep the cart stand premises even more clean than at present. The cart stand is completely removed from the main blocks.

(2) It is necessary that the Manager (Parbatapur) who is the only responsible official of the Chattram should reside on the premises.
